

Marketing Performance Dashboard

Project Overview

This dashboard analyzes marketing performance using Google Analytics 4 (GA4) data stored in Google BigQuery. It supports data-driven decisions by monitoring acquisition, engagement, conversions, and revenue.

Business Objective

Develop an interactive dashboard that enables marketing teams to evaluate campaign performance, customer behavior, and business growth.

Data Source

Google Analytics 4 (GA4) Export in Google BigQuery.

Key Performance Indicators

Total Users
New Users
Sessions
Engagement Rate
Purchases
Revenue
Average Order Value

Dashboard Sections

Executive Summary
Traffic Analysis
Marketing Channel Performance
Device Analysis
Geographic Analysis
Conversion Funnel
Revenue Analysis

SQL Workflow

GA4 Events → Data Cleaning → KPI Calculations → Business Analysis → Looker Studio Dashboard

Key Insights

Organic Search is a major acquisition source. Mobile traffic represents a significant share of users. Revenue and conversions can be monitored by channel, geography, and device.

Business Recommendations

Optimize high-performing channels, improve mobile experience, reduce checkout friction, and invest in data-driven campaign optimization.

Technology Stack

Google Analytics 4, Google BigQuery, SQL, Looker Studio, Git, GitHub
